System Implementation

Specialised ICT Support

General IT Support

Technical Project Management

OVERVIEW

The only constant in business is change. To deal with it you need systems that can not only meet your needs today but also grow to meet whatever needs your business may have tomorrow. And there is no one-size fits all. You need a business partner with the essential expertise to assist you to balance the levels of redundancy, reliability, scalability, flexibility and cost that are needed for your particular business. In short, you need a business partner in MERIT TS.

The MERIT TS team is highly skilled with decades of experience in architecture design services that give special consideration to your particular strategic ICT Business requirements. Likewise, when it comes to the actual implementation our team has been deploying and supporting open systems for a great number of years. We specialise in high availability, disaster recovery planning and backup and recovery for server and/or storage consolidation environments. MERIT TS has the unique methodology and know-how to ensure that your technology infrastructure keeps pace with changes in your business.

The MERIT TS value proposition is low risk because we progressively define the deliverables of each project and sub-project beforehand in documented form and share the required skills and expertise with in-house staff. We have had exposure to all the major server, storage, network and backup products and pride ourselves on remaining objective in our clients' ICT business interests at all times.

Because technology changes faster than business.™

Because technology changes faster than business.™
